This invention relates to a system and a method for detecting and filtering unsolicited and undesired electronic messages by automatically verifying that the purported originator of the electronic message actually sent the message.

Description of the Related Art

Electronic communication is an essential tool in facilitating both business and personal communication. One form of electronic messaging, email, offers several advantages over traditional forms of communication. Email allows for the almost instantaneous exchange of information, it allows for the transmission of multiple messages at very little cost and it permits the transfer of large data files from one sender to another user. Nonetheless, the inherent nature of email gives rise to certain
